## **MONROE COUNTY ANNOUNCES CONSTRUCTION PROJECT WEB SITE**

*Information on Lyndon Road Bridge available online.*

Monroe County Executive Jack Doyle today unveiled a new road construction Web site at [www.LyndonRoad.com](http://www.LyndonRoad.com) which offers valuable information on the Lyndon Road Replacement project in the Town of Perinton.

“This is an important transportation project that greatly impacts our residents,” said Doyle. “Offering a web site, in addition to other means of communication, is an excellent way to keep the public informed throughout planning and construction and provide them information as it becomes available.”

The Lyndon Road Replacement project began last fall and involves re-establishing north-south vehicular access over the Erie Canal and CSX Railroad in Perinton. Work includes:

- ◆ Replacement of the existing one-lane bridges over the Erie Canal and the CSX railroad facilities with new two-lane structures which include shoulders and sidewalk on both sides of the road.
- ◆ Replacement of the bridge over Thomas Creek.
- ◆ Reconstruction of approximately 2,700 feet of Lyndon Road.
- ◆ Reconstruction and widening of approximately 1,700 feet of NYS Route 31F, to provide dedicated turn lanes.
- ◆ Installation of a signal at the Lyndon Road/NYS Route 31F intersection.
- ◆ Installation of a closed drainage system within the project limits.
- ◆ Installation of sidewalks on both sides of Lyndon Road and NYS Route 31F within the project limits.

The Web site [www.LyndonRoad.com](http://www.LyndonRoad.com) will be updated regularly by the Monroe County Department of Transportation (MCDOT) and includes a project summary, construction sequence, map and photos. The site also informs the public of traffic impacts in relation to the bridge construction and facilitates correspondence with the construction team.

*(more)*

Additionally, prior to the beginning of major project operations, newsletters to local residents will be distributed by MCDOT and will contain key project information and construction photographs. Expected completion of the Lyndon Road Bridge Replacement project is November 2002.
